BINTA KANDE

Grid: choosing the right LLM for your case

Compare with your real tasks, not with a ranking.

Rankings change often and do not tell you which model suits your business. This grid helps you test 2 or 3 models on your real tasks, then decide calmly.

The 4-step test

1. Pick 5 real tasks: an email to write, a document to summarise, a question from your field, a content idea, a table to analyse.
2. Give exactly the same text to 2 or 3 models.
3. Score each answer from 1 to 5 in the grid below.
4. Add the practical criteria: price, privacy, connected tools.

The grid (to fill in)

Criterion	Model A	Model B	Model C
Quality in my language (1 to 5)			
Accuracy on my 5 tasks (1 to 5)			
Following my instructions (1 to 5)			
Price for my usage			
Protection of my data			
Size of documents accepted			
Connection to my tools			
Total			

Where to look at rankings

LMArena (lmarena.ai): an open ranking based on user votes. Artificial Analysis (artificialanalysis.ai): comparisons of quality, speed and price. Rankings do not always agree: use them to shortlist, then test.
